Skin care
Expert System

Professor:Dr.Kohestani
Student:Yasamin Alizadehashrafi

A prolog program that defines a system with the purpose of recommending skincare products based on different skin types.
The program recommends a list of suitable skincare products (according to the input of the user) relating to their skin type.

Program usage

```
(1 ms) yes
[| ?- recommend_products(dry, Products).

Products = [cleanser,moisturizer,serum,sunscreen]

yes
[| ?- recommend_products(oily, Products).

Products = [cleanser,toner,moisturizer,sunscreen]

yes
[| ?- recommend_products(normal, Products).

Products = [cleanser,moisturizer,sunscreen]

yes
[| ?- recommend_products(sensitive, Products).

Products = [cleanser,moisturizer,sunscreen]
```
